# Classic Circular sign system
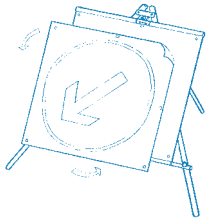

Product Details

Signface constructed from reinforced PVC with a **reflective** coating **protected** by a clear PVC top layer. Sign symbol **printed on the inside** of the clear PVC top layer and therfore **also protected.**

Concealed bar in top of sign panel hooks onto "**mouses ear**" on tripod. Springs provide the tension required to ensure signface is kept taut.

Weight hook on back leg of tripod for hangin ballast if conditions are volatile and additional stability is required.

Circular signs can be supplied with a **reversible** signface which is very popular for directional arrow signs. Fixed to the backcloth using rust-proof press-studs the signface can be removed, rotated through 90° and re-positioned.

Ground clearance of 300mm as specified by UK road sign legislation.

All metalwork is heavy duty bright zinc plated to **prevent corrosion.**
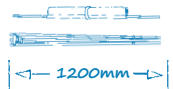

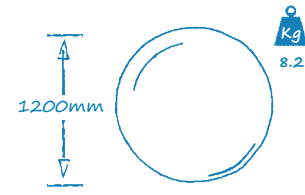

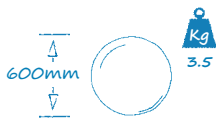

Press stud strap holds signface neatly rolled-up when in storage or transportation. includes product information such as sign diagram, size and class of reflectivity (standard UK spec product only).

Bar in bottom hem of sign panel extends to hok under spacer bolts on front legs of tripod.
